

RAM BHUVAN HARSHITH ALLAKA

Prayagraj, Uttar Pradesh ✉ allakaharshith11@gmail.com 🌐 GitHub 🔗 LinkedIn 📞 +91-8639182840

Summary

Full-stack Software Developer with hands-on industry experience in **Java (Spring Boot)**, **Node.js**, **PostgreSQL**, and **RESTful APIs** — building scalable microservices and dashboards serving 10,000+ users. Research background in federated machine learning. Strong foundation in DSA, system design, and observability tooling across production environments. Proficient with AI development tools including Cursor, GitHub Copilot, and Claude.

Education

- **Indian Institute of Information Technology, Allahabad** Prayagraj, Uttar Pradesh
B.Tech in Information Technology | CGPA: 8.36 (Till 7th Semester) Nov 2022 – Present

Experience

- **Software Developer Intern | Nykaa** Gurugram, Haryana
Seller Portal Team Jan 2026 – Present
 - Designed and delivered the **end-to-end Seller Scorecard** feature — shipping a **Node.js/PostgreSQL** backend with **RESTful APIs** and a **React.js + Redux** frontend; also developed and maintained **Java (Spring Boot)** microservices, implementing business logic and **PostgreSQL** query optimisations for downstream services; system computes real-time performance metrics for **10,000+ vendors**.
 - Engineered **distributed tracing** across **6+ microservices** using **AsyncLocalStorage** to propagate **traceId/requestId** headers, enabling end-to-end request traceability in **New Relic** and **Kibana**; built **Grafana** observability dashboards integrating **Elasticsearch** log data to surface failure rates and stuck requests across Seller Discount and Catalog services.
 - Authored **unit tests**, **technical documentation**, and **design specifications** for all impacted repositories; validated changes through structured **pre-production testing** before deployment via **Jenkins CI/CD**; delivered system analysis findings to senior engineers and product stakeholders to drive software improvements.
- **Research Intern | IIIT Allahabad** Prayagraj, Uttar Pradesh
Distributed Learning Lab May 2025 – June 2025
 - Designed a **machine learning-based Hybrid Robust Aggregation Algorithm** for Federated Multi-Armed Bandits, resilient to **49%** adversarial clients; validated correctness through **Python simulations** over **1,000+ iterations**, achieving a **20% reduction in cumulative regret** vs. baselines (**Fed2-UCB**, **MoM-UCB**); prepared **written documentation** of methodology and results for academic publication.

Projects

- **DudeWala | GitHub | Live Demo**: Full-stack e-commerce platform for recurring dairy product subscriptions.
 - Architected a **Node.js/Express + MongoDB** backend with **JWT authentication**, multi-role session management, and secure order processing; automated subscription fulfilment via **cron jobs**, eliminating **100%** of manual recurring-order overhead; built fully responsive **React.js** frontend with reusable component library.
- **FinSight | GitHub | Live Demo**: Personal finance app with receipt scanning and spending analytics.
 - Integrated **Tesseract.js OCR** and PDF parsing to auto-extract and validate transaction data from receipts, **reducing manual data entry by 70%**; maintained **code documentation and test results** throughout the project life cycle; rendered real-time breakdowns via **Chart.js** with **JWT + bcrypt** authentication.
- **Inventory Management System | GitHub**: Concurrent multi-user inventory system for real-time stock optimisation.
 - Built a **PHP/MySQL** backend with transaction-safe concurrent queries and a dynamic **HTML/CSS/JS** admin panel; applied **analytical problem-solving** to diagnose data consistency issues, **reducing manual entry errors by 30%** and improving overall system reliability.

Technical Skills

- **Languages & Frontend**: C, C++, Java, JavaScript, Python | React.js, Redux, HTML5, CSS3, SCSS, Chart.js
- **Backend & Databases**: Node.js, Express.js, REST APIs, JWT, Spring Boot | MySQL, PostgreSQL, MongoDB, Elasticsearch
- **AI/ML**: Machine Learning, Federated Learning, Multi-Armed Bandits, Neural Networks, NumPy
- **DevOps & Observability**: Git, Jenkins (CI/CD), Grafana, Kibana, New Relic, Postman
- **AI Development Tools**: Cursor, GitHub Copilot, Claude (Anthropic), VS Code
- **Software Engineering**: Full SDLC, Agile/Scrum, Unit Testing & QA, Code Review, Microservices, Distributed Tracing, DSA, OOP, OS, DBMS, System Design

Key Achievements

- Secured **All India Rank 6431** in JEE Mains 2022 — top **0.6%** among 1M+ candidates.
- Solved **1000+** problems on **LeetCode**, **Codeforces**, and **CodeChef**.
- Ranked **top 10%** among 200+ participants in the **Code Red** coding competition; organised coding events for **200+** participants as Tech Fest Executive.
